SUMMARY

Computer Science undergraduate with hands-on experience in web development and machine learning projects. Built full-stack applications and deep learning models. Comfortable working across the stack and eager to contribute to software engineering roles involving scalable systems and intelligent applications.

WORK EXPERIENCE

Software Development Intern — Edunet Foundation

Jun 2024 – Jul 2024

- Engineered a responsive student portfolio web app using HTML, CSS, and JavaScript, focused on usability.
- Validated behavior across devices and optimized performance to meet functional requirements.

PROJECTS

Personal Expense Tracker (MERN Stack)

- Developed a full-stack expense tracker using MongoDB, Express, React, and Node.js.
- Implemented JWT-based authentication and role-based access control.
- Developed RESTful APIs and optimized backend performance.

Lung Disease Detection using Deep Learning

- Built a multimodal clinical decision-support system that classifies lung disease from chest X-rays using an EfficientNetB0 model (two-phase transfer learning), combined with patient vitals for severity triage.
- Achieved 90.2% test accuracy across 4 disease classes on a 3,176-image test set, using CLAHE preprocessing and class-weighted training to handle data imbalance.
- Added Grad-CAM explainability and a rule-based consistency guard to flag low-confidence or clinically inconsistent predictions, deployed via an interactive Streamlit dashboard.

Shortly – URL Shortener & Link Analytics Platform

- Developed a full-stack URL Shortener, Link Analytics Platform using React, Node.js, Express.js, and MongoDB Atlas with secure JWT-based authentication.
- Implemented custom short URLs, QR code generation with PNG download, click tracking, and complete link management (CRUD) through a responsive dashboard.
- Designed the backend using a Controller–Service–Repository architecture with RESTful APIs and environment-based configuration.

SKILLS

Programming Languages	C, Python, Java
Web Technologies	HTML, CSS, JavaScript, React
Backend & Databases	Node.js, Express, MySQL, MongoDB
Cloud & Tools	AWS (Fundamentals), Git, GitHub, VS Code

EDUCATION

2022 – Present	B.Tech in Computer Science Engineering — SRM University AP	CGPA: 7.63
2020 – 2022	Intermediate Education — Sri Chaitanya Educational Institutions	87%

CERTIFICATIONS

- AWS Cloud Fundamentals — Coursera
- The Joy of Computing Using Python — NPTEL, IIT Madras
- Google AI Professional Certificate — Coursera
